

Erfan Moeini

FULL-STACK MACHINE LEARNING ENGINEER

Aachen, Germany

+49 176 77879262 | moeinierfan79@gmail.com | alpharmike | erfan-moeini

Personal Profile

Results-driven Machine Learning Engineer with an M.Sc. in Data Science from RWTH Aachen University and industry experience at Volkswagen, Mercedes-Benz, Amadeus, and INFORM. Specialized in end-to-end ML systems—time-series forecasting, AutoML, meta-learning, and MLOps. Lead technical development of Cognimata, an agentic AI automation platform. Skilled in building scalable systems with cloud-native and DevOps practices, with focus on generative AI, LLM integration, and automation-first engineering.

Work Experience

Artavision UG

Aachen, Germany

Lead Technical Engineer

Mar 2026 - Present

- Launched and developed Cognimata, a platform for AI-powered workflow automation and agentic AI systems targeting business process optimization.
- Provide AI consultancy services, advising organizations on AI strategy, LLM integration, and the adoption of automation-first engineering practices.

INFORM GmbH

Aachen, Germany

Software Engineer (AI & Machine Learning)

Jun 2025 - Present

- Designed and deployed the department's MLOps platform, establishing end-to-end pipelines for model training, versioning, monitoring, and deployment.
- Developed AI-driven optimization software for container terminal logistics, improving scheduling and distribution efficiency across terminal operations.
- Contributed to the core Terminal Operating System (TOS), integrating machine learning modules to enhance real-time decision-making in port logistics.

Volkswagen AG

Wolfsburg, Germany

Machine Learning Research Intern

Jul 2024 - Mar 2025

- Developed and evaluated meta-learning strategies for automated deep learning model selection in automotive time-series forecasting as part of the R&D team.
- Benchmarked transfer learning and few-shot learning approaches across multiple time-series datasets, demonstrating improved model adaptation under limited labeled data.

Amadeus Leisure IT GmbH

Kohlscheid, Germany

Software Developer

Apr 2023 - Jun 2024

- Designed and developed RESTful microservices using OpenAPI specification to aggregate and deliver travel data across multiple destination endpoints.
- Automated CI/CD pipelines with Jenkins and deployed containerized services on Kubernetes, reducing manual deployment overhead and improving release reliability.

Mercedes-Benz AG

Sindelfingen, Germany

Process Mining Intern

Sep 2023 - Dec 2023

- Engineered an end-to-end data pipeline for detecting and monitoring Overall Equipment Effectiveness (OEE) across manufacturing production lines.
- Developed interactive visualization dashboards for real-time downtime analysis, enabling production managers to identify and address performance bottlenecks.

Derak Cloud Ltd.

Shiraz, Iran

Data/Cloud Engineer

May 2021 - Oct 2022

- Developed and maintained a multi-tenant SaaS platform providing CDN, IaaS, and Video-on-Demand services to enterprise customers.
- Architected data pipelines using message queues and brokers for real-time data replication and infrastructure monitoring.
- Built a real-time tweet processing and sentiment analysis application enabling data-driven advertising decisions by the marketing team.

Deed Asia Ltd.

Shiraz, Iran

AI Intern

Jul 2019 - Sep 2019

- Developed a License Plate Recognition (LPR) system combining OCR with YOLO-based object detection, trained on a custom-labeled dataset of Iranian license plates.

Education

RWTH Aachen University

Aachen, Germany

Data Science M.Sc.

Oct 2022 - Mar 2025

- Thesis: Meta-Learning Approaches for Time-Series Deep Learning (conducted at Volkswagen AG).
- Ranked among the top 5% of students based on academic performance.

Shiraz University

Shiraz, Iran

Computer Engineering B.Sc.

Sep 2018 - Aug 2022

- Ranked 851st in the National Entrance Exam (among 150,000 applicants).
- Finished with an 18.54/20 CGPA. Ranked 3rd among the 81 students of my class.

Academic Projects

Performance Spectrum and Correlation Plot Widgets

Aachen, Germany

RWTH Aachen University - Process Mining in Celonis Lab

Winter 2022/2023

- Designed and implemented interactive widgets on the Celonis Platform for performance spectrum visualization and correlation analysis, simplifying bottleneck detection and root cause analysis in business processes.

Aphrodite, A Covid-19 Detection Application

Shiraz, Iran

Shiraz University - Systems Analysis and Design Course

Fall 2021

- Built and deployed a dockerized Covid-19 detection web application using the pre-trained COVIDNet-CT model, developed in collaboration with Shiraz University of Medical Sciences.

Real-time Pose Estimation

Shiraz, Iran

Shiraz University - Open Research Project

Fall 2021

- Estimated cable crossover machine force using 3D pose estimation by integrating TRT-Pose on NVIDIA Jetson Nano for real-time inference at the edge.

Skills

Machine Learning & AI	PyTorch, TensorFlow, Keras, Scikit-Learn, Ray, Pandas, NumPy, SciPy, MLflow, Metaflow
Agentic Frameworks/Workflows	LangChain, LangGraph, Crew AI, OpenAI Agents SDK, Claude Agents SDK, n8n
Programming Languages	Python, C/C++, Java, JavaScript, Go, R
Data Engineering	Spark, Kafka, Hadoop, Prometheus, Grafana, ELK Stack
Cloud & DevOps	Docker, Kubernetes, Jenkins, Argo CD, Ansible, CI/CD, Azure ML, CUDA
Databases	MySQL, MongoDB, ClickHouse, Firebase, Redis
Web Frameworks & APIs	OpenAPI, Django, Flask, Spring Boot, Node.js, Angular, Vue.js, D3.js
Tools & Platforms	Linux, Git, Shell (Bash/Zsh), LaTeX, JIRA

Achievements

2023	Ranked First, Public Transport & Micro-mobility Competition, Hackathon	Paris, France
2023	Dean's List, RWTH Aachen University	Aachen, Germany
2020	Ranked First in the Technical Footsteps Competition, I.D.E.A Association	Shiraz, Iran

Languages

English	Full Proficiency
German	Intermediate Proficiency
Persian	Native Proficiency
